- ✓ **Web visuals add effectiveness and efficiency to remote meetings**
Sharing presentation and documents helps participants to be more engaged and productive.

WebPresentNow ^{WPN}

WebPresentNow™ is an easy-to-use web conferencing service for Macs or PCs designed for accessibility and simplicity. No download is needed for meeting attendees and there is no need to upload content for presentations. Key features, including PowerPoint® presentation sharing, desktop sharing, chat, and recording, are standard in WebPresentNow. WebPresentNow is available via flexible pricing plans.

Most Popular Features

No Download

WebPresentNow is a browser-based tool, which makes hosting or joining a meeting easy.

Desktop Sharing

Share your screen. Show your entire desktop, an application or a website.

Webcam Video

Add video conferencing to the meeting. Show up to 6 webcams at the same time.

Works Anywhere

Host an interactive, fully functional web meeting on Windows, Mac OS X or Linux.
